ECO-READY Observatory, Living Labs, and Policy Uptake for a Resilient European Food System - Rome

This workshop will bring together project partners, Living Labs, EU platforms, and key stakeholders to explore how the ECO-READY Observatory can support evidence-based decisions for resilient European food systems. Over two days, participants will engage in demonstrations, interactive sessions, and policy dialogues to co-design pathways for Observatory uptake in practice and policy. Our aim is to foster concrete collaborations, data and knowledge integration, and long-term opportunities for sustaining the Observatory and Living Labs beyond the project's lifetime.

We warmly encourage your participation and look forward to working with you in Rome to shape the future of climate-resilient, biodiversity-friendly, and food-secure European food systems
